Aksara Bhagavad Gita: Imperishable Bhagavad Gita Haribakth 2020-02-25 How were the rules framed? They were framed based on the parameters. How was Parameter identified and on what authority? Parameters were identified based on the attributes of the Gita. The authority too is derived from God/Gita. Isn't the identification process obsolete and unscientific? There isn't anything more scientific

than the Gita. Just see the explosion of Artificial intelligence applications, be it Drones, Siri, Echo, or Robots. They are all non-human but endowed with intelligence.

Syntactic Theory and First Language Acquisition (Vol.1) Barbara Lust 2018-10-24 Universal Grammar (UG) is a theory of both the fundamental principles for all possible languages and the language faculty in the "initial state" of the human organism. These two volumes approach the study of UG by joint, tightly linked studies of both linguistic theory and human competence for language acquisition. In particular, the volumes collect comparable studies across a number of different languages, carefully analyzed by a wide range of international scholars. The issues surrounding cross-linguistic variation in "Heads, Projections, and Learnability" (Volume 1) and "Binding, Dependencies, and Learnability" (Volume 2) are arguably the most fundamental in UG. How can principles of grammar be learned by general learning theory? What is biologically programmed in the human species in order to guarantee their learnability? What is the true linguistic representation for these areas of language knowledge? What universals exist across languages? The two volumes summarize the most critical current proposals in each area, and offer both theoretical and empirical evidence bearing on them. Research on first language acquisition and formal learnability theory is placed at the center of debates relative to linguistic theory in each area. The convergence of research across several different disciplines -- linguistics, developmental psychology, and computer science -- represented in these volumes provides a paradigm example of cognitive science.

Electrical Power Systems P.S.R. Murty 2017-06-12 Electrical Power Systems provides comprehensive, foundational content for a wide range of topics in power system operation and control. With the growing importance of grid integration of renewables and the interest in smart grid technologies it is more important than ever to understand the fundamentals that underpin electrical power systems. The book includes a large number of worked examples, and questions with answers, and emphasizes design aspects of some key electrical components like cables and breakers. The book is designed to be used as reference, review, or self-study for practitioners and consultants, or for students from related engineering disciplines that need to learn more about electrical power systems. Provides comprehensive coverage of all areas of the electrical power system, useful as a one-stop resource Includes a large number of worked examples and objective questions (with answers) to help apply the material discussed in the book Features foundational content that provides background and review for further study/analysis of more specialized areas of electric power engineering

A Comparative Study of R. K. Narayan and Arundhati Roy: Linguistic and Literary Aspects N. Prasanna Lakshmi 2020-11-18 Broadly speaking, Indian English (IE) is that variety of English used by a large number of educated Indians as a second language. Kachru (1983) used the term 'Indian English' for the variety of English used generally in the South Asian countries. David Crystal (2003) observes that in India the numbers of English speakers outrank the combined number of speakers in USA and UK. A considerable body of creative writing is also produced in English and is increasing steadily. Writers like Mulk Raj Anand, R.K. Narayan, and Raja Rao, and Arundhati Roy, have become part of India's literary tradition and they may continue to hold their status in world literature too. The use of Indian English in different domains in interaction with other regional languages has resulted in its development and recognition as a distinct variety in its own right. It is an attempt to study the styles of two of the prominent writers of Indian English, namely R.K. Narayan and Arundhati Roy by examining the different linguistic and literary aspects as reflected in their selected fictions—R.K. Narayan's "Swami and Friends" (SF) and "The Guide" (TG) and Arundhati Roy's "The God of Small Things" (GST). An examination of selected fictions of the two writers of this study has shown that stylistic analysis can be a rich field of enquiry in Indian English. Studies of the present kind can be used as a source material for applied linguistics. They can be extended for a comparative study of stylistic traits of Indian writers and non-Indian writers. The study suggests the possibility of further research in comparative stylistic studies in Indian English fiction, on the one hand, and American, British, or Australian fiction, on the other. Our comparison of the two writers, one of the colonial period and the other belonging to the post-colonial period, suggests that a

more extensive stylistic study of Indian writing in English is called for to understand the changing phases of English in the socio-cultural ethos of the Indian society. The book is organized as follows: Chapter-I is an introduction to Indian English, its importance and the objective of the research. Chapter-II deals with review of literature on Indian English as well as stylistic studies in Indian English fiction. Chapter-III is concerned with a brief introduction to the texts chosen for study. Chapter-IV discusses the methodology adopted in the study. Chapter-V deals with the results of the study and makes a comparison between the two authors' styles. Chapter-VI consists of a summary of the research and concludes with suggestions regarding further research needs.

The need, for co-ordination in the work of the Universities in India was expressed by the Calcutta University Commission in their Repdrt, and in 1921, acting on a resolution passed by the Congress of the Universities of the Empire, the Indian Delegates to the Congress passed a resolution recommending to the Univer sities of India that an Association or a Committee of Represent atives of different Indian Universities be formed with the object of dealing with questions affecting their mutual and common interest. It was suggested in particular, that such an association, if formed, should go into the question of certain difficulties which might arise owing to the conditions of admission of students to certain courses and examinations of the Universities of the United Kingdom not being suited to the qualifications which students from Indian Universities could present. The Lytton Committee on Indian Students in England also hoped that the Indian University authorities would take steps at an early date to establish an Inter-University Board for the purpose of co-ordinating the courses of study in India and securing uniformity in their recogni tion abroad. The Indian Universities' Conference held at Simla, in May 1924, passed a resolution unanimously recommending to the Universities that it was desirable that an Inter-University organization should be established. The functions assigned to it were the following: (i) To act as an Inter-University organization and Bureau of information; (ii) To facilitate the exchange of professors; (iii) To serve as an authorized channel of communication and facilitate co-ordination of University work; (iv) To appoint or recommend, where necessary, a commonrepresentative or representatives of India at Imperial or International Conferences on Higher Education; (v) To assist Indian Universities in obtaining recognition for their degrees, diplomas and examinations in other countries; (vi) To act as an Appointments' Bureau for Indian Univer sities; (vii) To fulfil such other duties as may be assigned to it from time to time by the Indian Universities. VIII A Provisional Committee consisting of representatives of the Universities was also appointed to discuss ways and means and other preliminaries with regard

Electrochemical energy storage systems and devices Dr. Suman Gandhi 2021-06-09 Electrochemical energy storage systems have the potential to make a significant contribution to achieving sustainable energy in the future. This book discusses the fundamental principles of electrochemical energy storage and the three major types of systems available: rechargeable batteries, fuel cells, supercapacitors. A

rechargeable battery is made up of a series of electrochemical cells. During charging, electrical energy from an external source is stored in the battery and can then be used to power an external load during discharging. The lead-acid system, which has been in use for over 150 years, and the much more recent lithium and sodium system are discussed in detail; sodium-sulfur and nickel-metal hydride systems are also briefly discussed. A fuel cell is an electrochemical cell in which the reactants that generate the energy are not stored within the cell but are continuously supplied to the electrodes via an external source. A common example is a hydrogen-oxygen fuel cell; in this case, hydrogen and oxygen are generated via electrolysis of water, and the fuel cell and electrolyser act as a storage system for electrochemical energy. The authors describe both high- and low-temperature fuel cells and discuss several examples for each. A flow battery, like a conventional rechargeable battery, can be charged and discharged repeatedly. The energy storage material, on the other hand, is dissolved in the electrolyte and thus can be stored in external tanks. Numerous types of flow batteries are either commercially available or in development. Three of the most significant examples are discussed in detail: all-vanadium flow batteries, zinc-bromine hybrid flow batteries, and all-iron slurry flow batteries. Several additional examples are briefly mentioned. The electrochemical storage system that is selected is highly dependent on the project's specific requirements, the associated upfront capital and lifetime expenditure costs, as well as end-of-life, environmental, and safety considerations.

Studies in South Asian Linguistics James W. Gair 1998 This volume collects twenty-nine published and unpublished papers by the linguist James Gair, considered the foremost western scholar of the Sri Lankan languages Sinhala and Jaffna Tamil. Ranging over thirty years, his work also considers issues in a variety of Indian languages, including Hindi, Marathi, Tamil, Malayalam, and Bengali. The collection reflects the wide range of Gair's interests, from morpho-syntactic questions to questions regarding historical and areal linguistics, especially language contact and diglossia, and extending to language acquisition. By collecting these papers and making them newly accessible, this volume will provide an important resource not only for scholars of these languages but for linguists interested in the theoretical issues Gair explores.

RECENT TRENDS AND PATTERNS OF AGRICULTURAL CREDIT IN INDIA Bandameedi Nagaraju 2018-03-01 This book examines the Recent Trends and Patterns of Agricultural Credit in India during the Post-reforms period, one of the defining aspects of the current phase of globalization and economic reforms is the increased threat to the livelihoods of small farmers in developing countries. There are instances of this across the developing world, from 1998 until the present; thousands of small farmers have committed suicide in India. For the proper functioning of an agriculture system farmers need to use many inputs. One among them is credit. It is considered as an important part in the development of agriculture. The study is exclusively based on secondary data. The data have been collected from various issues of Report on Currency and Finance (RBI), Banking Statistics (RBI), Report on Trends and Progress in Banking in India (RBI), RBI Bulletin (RBI), NABARD, various rounds of NSSO, Centre for Monitoring Indian Economy (CMIE), Statistical Outline of India (Tata Services Ltd.) and Economic Survey (Government of India). The main objective of this book is to provide students and instructor with clear, up-to-date and sample and straight forward approach to learn about agricultural credit. It may helpful for

TALES FROM A BYGONE ERA J.A. RAMA MOORTY 2021-07-27 This is an attempt to spread some cheer and positive vibes at a time when there is an almost all-pervading gloom – largely triggered by the pandemic. The author has used his phenomenal memory to chronicle the instances narrated by luminaries like his family elders, school teachers, instructors from an in-service training institution and professional colleagues. There is also a section about some memorable programmes beamed over All India Radio. The readers will find that the book covers a wide gamut that includes humour, pragmatism, and life-skills. It could also be seen that the central characters in these instances are not well-known personalities (about whom most of us have already read or heard a lot). Instead, the 'narrators' have been persons with whom most of us can easily identify.
