Misunderstandings in ATC Communication Immanuel Barshi 2016-04-22 Effective radio communication between ATC and pilots has long been recognized as an important element of aviation safety. In recognition of the role miscommunications play in aviation incidents and accidents, the International Civil Aviation Organization (ICAO) recently introduced language proficiency requirements for all flight personnel in all ICAO member states. Using an effective and economical experimental paradigm, the research described here teases apart the complex combination of factors (e.g. speech rate, controller message length, English language proficiency, cognitive workload) believed to contribute to miscommunications between controllers and pilots. Misunderstandings in ATC Communication offers an in-depth report of a seminal study in aviation communication, which until now has only been available in the form of an unpublished dissertation. In addition, it offers a recent extension of that work, the authors' reflections on the research process, and a thorough review of the aviation communication literature. Graduate students and researchers who wish to address real-world problems will appreciate the simple elegance of the experimental paradigm that has been used to address a wide range of theoretical and applied interdisciplinary research questions. The book will appeal to scholars in the fields of human factors, linguistics, cognitive psychology, applied linguistics and second-language education and assessment. It is also of direct relevance to government and industry decision-makers and operators as they strive to implement the ICAO requirements, and to improve aviation safety.

Fatal Words Steven Cushing 1997-05-15 On March 27, 1977, 583 people died when KLM and Pan Am 747s collided on a crowded, foggy runway in Tenerife, the Canary Islands. The cause, a miscommunication between the pilot and the air traffic controller. The pilot radioed, "We are now at takeoff," meaning that the plane was lifting off, but the tower controller misunderstood and thought the plane was waiting on the runway. In Fatal Words, Steven Cushing explains how miscommunication has led to dozens of aircraft disasters, and he proposes innovative solutions for preventing them. He examines ambiguities in language when aviation jargon and colloquial English are mixed, when a word is used that has different meanings, and when different words are used that sound alike. To remedy these problems, Cushing proposes a visual communication system and a computerized voice mechanism to help clear up confusing language. Fatal Words is an accessible explanation of some of the most notorious aircraft tragedies of our time, and it will appeal to scholars in communications, linguistics, and cognitive science, to aviation experts, and to general readers.

Human-Computer Interaction and Operators' Performance Gregory Z. Bedny 2010-08-09 A collection of works authored by leading scientists from the US and Russia, Human-Computer Interaction and Operators' Performance: Optimizing Work Design with Activity Theory describes applied and systemic-structural activity theory as it is used to study human-computer interaction, aviation, design, and training. Important from a theoretical and practical perspective, the book describes new analytical and experimental methods in the study of human work. The book facilitates the exchange of ideas between scientists working in ergonomics, human factors, human-computer interaction, industrial/organizational psychology, economics, management training, and other related areas. Drawing on their theoretical perspectives, the authors provide a comparative analysis of the various schools working in activity theory and a new approach to the study of human work derived from applied and systemic-structural activity theory. They cover special topics such as functional analysis of attention and classification of professions developed utilizing applied activity theory methods. In addition the book presents comparative analysis of work activity theory and applications. Representing the next significant step in the development of applied and systemic-structural activity theory, the book offers a balanced picture of theoretical and applied issues in the study of human work from general, applied, and systemic-structural activity theory points of view. It provides state-of-the art information and emphasizes its application to the study of human work while interacting with advanced technology. Aviation Disasters David Gero 2009-05-29 Flying as an airline passenger is, statistically, one of the safest forms of travel. Even so, the history of civil aviation is littered with high-profile disasters involving major loss of life. This new edition of the authoritative work on the subject brings the grim but important story of air disasters right up to date. David Gero assembles a list of major air disasters since the 1950s across continents. He investigates every type of calamity, including those caused by appalling weather, mechanical failure, pilot error, inhospitable terrain and hostile action. The first incident of sabotage involving a commercial jetliner is covered, as is the first, much-feared crash of the jumbo jet era. Examined alongside less well-known disasters are high-profile episodes such as that of Pan American Flight 103 at Lockerbie in 1988, the Twin Towers tragedy of 11 September 2001 and, more recently, the disappearance of Malaysia Airlines Flight 370 in 2014 – the greatest mystery of the commercial jet age. Aviation Disasters is the authoritative record of air disasters worldwide, fully illustrated with a fascinating selection of photographs.

Greatest Jokes of the Century Thomas F. Shubnell 2008-09 If it is medically possible to "bust a gut," this seventh edition of Greatest Jokes will certainly do it. Guffaws galore. Tremendous titters. Bountiful belly laughs. Serious snickers. Humongous Humor.

To the Limit Tom A. Johnson 2006 Helicopter pilots in Vietnam kidded one another about being nothing but glorified bus drivers. But these "rotor heads" saved thousands of American lives while performing what the Army classified as the most dangerous job it had to offer. One in eighteen did not return home. Tom A. Johnson flew the UH-1 "Iroquois" -- better known as the "Huey" -- in the 229th Assault Helicopter Battalion of the First Air Cavalry Division. From June 1967 through June 1968, he accumulated an astonishing 1,600 flying hours (1,150 combat and 450 noncombat). His battalion was one of the most highly decorated units in the Vietnam War and, as part of the famous First Air Cavalry Division, helped redefine modern warfare. With tremendous flying skill, Johnson survived rescue missions and key battles that included those for Hue and Khe Sanh and operations in the A Shau and Song Re valleys, while many of his comrades did not. His heartfelt and riveting memoir will strike a chord with any soldier who ever flew in the ubiquitous Huey and any reader with an interest in how the Vietnam War was really fought.

Radar In Blue James W. McCleary 2022-08-01 The book is the author's experiences as an air force air traffic control officer from second lieutenant to captain in the United States and in Pleiku, South Vietnam. It also illustrates the many problems associated with controlling American and allied aircraft in a war zone while sometimes being the target of enemy forces.

Cleared for Takeoff Aviation English Made Easy Liz Mariner 2016-02-08 Cleared for Takeoff: Aviation English Made Easy is the second book in the comprehensive Mariner Method(tm) series. Author Liz Mariner presents the sensible approach she has been using with remarkable success in pilot training and English for aviation classrooms all over the world for the last 20 years. Cleared for Takeoff has been designed not as a textbook, but as a workbook for use in the ESL or flight training classroom or as a tool for individual study. Students will benefit from group learning exercises and working in pairs or individually by following the simple instructions. The essential Aviation English text for your pilot training or air traffic control training program, Cleared for Takeoff is the proven, practical approach. The accompanying audio recordings accurately recreates the environment pilots and controllers encounter. Students will gain extensive listening practice and opportunities to practice speaking what they have learned from the wide variety of interactive exercises. The audio recordings are embedded in the iBook version, downloadable in the kindle and pdf versions, and in the print version. In this book, students will understand and use the most common terms in: Communications with air traffic control Student and instructor communications Airport features and the traffic pattern Aircraft features The ATIS The basics of flight

Uncle John's Funniest Ever Bathroom Reader Bathroom Readers' Institute 2013-10-15 The title says it all. This is the funniest Bathroom Reader EVER. It might even be the funniest book in the history of books, but Uncle John is much too modest to state that outright (even though it is). Over the past 25 years, the Bathroom Readers' Institute has published more than 40,000 pages of bathroom reading. In this book you will find the funniest 288 of them (with a few all-new funny pages squeezed in just because we couldn't help ourselves). That's page after page after page of laugh-out-loud dumb jokes, dumb jocks, toasts, pranks, kings, kittens, caboodles, and, of course, poorly translated kung-fu movie subtitles--such as. "It took my seven digestive pills to dissolve your hairy crab!" So whether you like your humor witty or witless, light or dark, or silly or sublime, you'll laugh until your head explodes. Chortle at... * Dumb crooks: The robber who ran face-first into a wall because he forgot to poke eye holes in his pillow case. * Witty wordplay: If Snoop Doggy Dogg were to marry Winnie the Pooh, his name would become Snoop Doggy Dogg Pooh. * Flubbed headlines: "British Left Waffles On House Floor" * Quirky stars: Billy Idol's concert rider demands he have one large tub of I Can't Believe It's Not Butter in his dressing room. * Job Lingo: If you hear an E.R. doc mention a "VIP," be on the lookout for a "Very Intoxicated Patient." * Comedian quips: "I wonder if deaf people have a sign for 'Talk to the hand.'" --Zach Galifianakis * Sputtering sportscasters: "If only faces could talk." --Pat Summerall And much, much more!

English in Global Aviation Eric Friginal 2019-11-14 Taking readers step-by-step through the major issues surrounding the use of English in the global aviation industry, this book provides a clear introduction to turning research into practice in the field of English for Specific Purposes (ESP), specifically Aviation English, and a valuable case study of applied linguistics in action. With both cutting-edge research and evidence-based practice, the critical role of English in aviation is explored across a variety of contexts, including the national and global policies impacting training and language assessment for pilots, air-traffic controllers, ground staff, and students. English in Global Aviation teaches readers how to apply linguistic research to real world, practical settings. The book uses a range of corpus-based findings and related research to provide an effective analysis of the language needs of the aviation industry and an extended look at linguistic principles in action. Readers are presented with case studies, transcriptions, radiotelephony, and a clear breakdown of the common vocabulary and phrasal patterns of aviation discourse. Students and teachers of both linguistics and aviation will discover the requirements and challenges of successful intercultural communication in this industry, as well as insights into how to teach, develop, and assess aviation English language courses.

Cleared for Takeoff Peter Hafkus 2021-06-09 An executive expat writes memoirs of his studies and work abroad: childhood in postwar Germany; student life in Berlin, Paris, and the USA; and when he was a true pioneer in the early globalization of manufacturing in Europe, Asia, and the Americas. In a series of short stories, he recounts his funny foreign adventures and invites you to listen to the music of those days. He tells daring flying stories as a small airplane pilot traveling around the world. Presently, he lives retired in Mexico.

The Routledge Handbook of Corpus Approaches to Discourse Analysis Eric Friginal 2020-12-17 The Routledge Handbook of Corpus Approaches to Discourse Analysis highlights the diversity, breadth, and depth of corpus approaches to discourse analysis, compiling new and original research from notable scholars across the globe. Chapters showcase recent developments influenced by the exponential growth in linguistic computing, advances in corpus design and compilation, and the applications of sound quantitative and interpretive techniques in analyzing text and discourse patterns. Key discourse domains covered by 35 empirical chapters include: • Research contexts and methodological considerations; • Naturally occurring spoken, professional, and academic discourse; • Corpus approaches to conversational discourse, media discourse, and professional and academic writing. The Routledge Handbook of Corpus Approaches to Discourse Analysis is key reading for both experienced and novice researchers working at the intersection of corpus linguistics and discourse analysis, as well as anyone undertaking study in these areas, as well as anyone interested in related fields and adjacent research approaches.

Twelve Days Alex Berenson 2015-02-10 John Wells has only twelve days to stop the United States from being tricked into invading Iran in the new cutting-edge novel of modern suspense from the #1 New York Times–bestselling author. Twelve days. Wells, with his former CIA bosses Ellis Shafer and Vinnie Duto, has uncovered a staggering plot, a false-flag operation to convince the President to attack Iran. But they have no hard evidence, and no one at Langley or the White House will listen. Now the President has set a deadline for Iran to give up its nuclear program, and the mullahs in Tehran—furious and frightened—have responded with a deadly terrorist attack. Wells, Shafer, and Duto know they have only twelve days to find the proof they need. They fan out, from Switzerland to Saudi Arabia, Israel to Russia, desperately trying to tease out the clues in their possession. Meanwhile, the United States is moving soldiers and Marines to Iran's border. And Iran has mobilized its own squad of suicide bombers. And as the days tick by and the obstacles mount, they realize that everything they do may not be enough...

Fighter Pilot Christina Olds 2010-04-13 Please note: This ebook edition does not include the photo insert from the print edition. The widely anticipated memoir of legendary ace American fighter pilot, Robin Olds Robin Olds was a larger-than-life hero with a towering personality. A graduate of West Point and an inductee in the National College Football Hall of Fame for his All-American performance for Army, Olds was one of the toughest college football players at the time. In WWII, Olds quickly became a top fighter pilot and squadron commander by the age of 22—and an ace with 12 aerial victories. But it was in Vietnam where the man became a legend. He arrived in 1966 to find a dejected group of pilots and motivated them by placing himself on the flight schedule under officers junior to himself, then challenging them to train him properly because he would soon be leading them. Proving he wasn't a WWII retreat, he led the wing with aggressiveness, scoring another four confirmed kills, becoming a rare triple ace. Olds (who retired a brigadier general and died in 2007) was a unique individual whose personal story is one of the most eagerly anticipated military books of the year.

The Weak Send Rocks, The Strong Send Rockets Marek Arnaud 2012-11 Get a close up and personal view of what it's like to be an international diplomat. Marek Arnaud's account is a dynamic compilation of aphorisms, jokes, one-liners, observations and critiques about war, peace, international issues and the people who control world politics. From the dark times of the Soviet Union and the troubled Middle East to the sunny beaches of Australia, Arnaud regales the reader with the goings-on of international conferences (including at the United Nations) and a special brand of sometimes politically incorrect jokes that will have you laughing out loud. "The sense of humor, rare perceptivity, self-mockery and literary refinement of Marek Arnaud make his piece unique."—Prof. Adam Daniel Rotfeld, Former Minister of Foreign Affairs of Poland"With this playful, ironic collection of aphorisms and puns, the author debunks the widespread view that diplomats --the 'striped-pants boys,' according to JFK-- are a class or a species unto themselves."—Amb. Alvaro de Soto,Former Under-Secretary-General of the United Nations"This is an unusual publication. It stigmatizes moral weaknesses, such as greed or hypocrisy, and criticizes the prevailing world order (or rather disorder) as well as the abuse of rhetoric."—Dr. Jozef Goldblat,Vice President,Geneva International Peace Research Institute (GIPRI)

Diagnostic Expertise in Organizational Environments Mark W. Wiggins 2017-03-02 Diagnostic Expertise in Organizational Environments provides a state-of-the-art foundation for a new paradigm in expertise research and practice. Skilled diagnosis is essential for accurate and efficient performance across a range of organizational contexts, including aviation, finance, rail, forensic investigation, firefighting, and medicine. However, it is also a complex process, subject to the abilities and experience of individual operators, the culture and practices of organizations, the relationships between operators, and the availability and usefulness of technology. As a consequence, diagnostic skills can be difficult to learn, maintain, and evaluate. This volume is a comprehensive approach that examines diagnostic expertise at the level of the individual practitioner, in the social context, and at the organizational level. The chapter authors comprise both academics and highly skilled practitioners so that there is a clear transition from understanding the problem of diagnostic skills to the implementation of solutions, either through redesign, training, and/or selection. It will appeal to those academics and practitioners interested and involved in this field and also prove useful to students of psychology, cognitive science education and/or

computer interaction.

Air Cops Billy Robbins 2006-11 Written by a retired air traffic controller, *Air Cops: A Personal History of Air Traffic Control* takes a closer look at this adrenaline pumping occupation. Author Billy D. Robbins draws on his experience in this profession to describe navigation systems, past and present. Robbins started his training as a military control tower operator in the U.S. Air Force in 1950. His first job began during the Korean War at the March Air Force Base in southern California. It was there that he learned the daily activities of running a control tower, not all of them pleasant. Boredom, coupled with spurts of intense stress, created a difficult working environment—one that not everyone could handle. Robbins, however, thrived on the life of an air traffic controller and continued in the aviation profession for the next forty years. From the tense moments of dealing with airplane hijackers in Florida to the introduction of automated computer systems, Robbins's research and experience produces a sometimes hilarious, sometimes tragic view of the air traffic control profession.

Crew Resource Management and Cultural Dimensions in Aviation. Strengths and Risks Janina Klein 2022-09-01 Bachelor Thesis from the year 2021 in the subject Psychology - Industrial and organizational psychology, grade: 1,6, University of Applied Sciences Hamm-Lippstadt, language: English, abstract: This thesis focuses on the impact of culture on the failure of crew resource management (CRM) in aviation. Three cultural aspects are used to identify what impact culture can have on the failure of CRM. Those three cultural aspects are safety culture, professional culture, and national culture. Furthermore, three case studies are brought as an example. They include the case of TransAsia Airways GE222, Garuda Indonesia GA200, and Korean Air 801. On the 27th of March in 1977 many planes had to be diverted to other Canarian airports caused by a bomb exploding at the airport of Las Palmas de Gran Canaria. One of those was the small airport of Los Rodeos on the island of Tenerife that got very crowded due to the number of planes that had to be diverted, resulting in the runway having to be used as a taxiway. Two of the planes stranded at the airport were flight KLM 4805 and flight PAA 1736. When the bomb threat was lifted and the planes started to leave Los Rodeos, KLM 4805 was instructed to taxi down the runway, turn around, and then eventually take off. The PAA 1736 taxied the runway after the KLM 4805 and was instructed to leave the runway at exit three so the KLM 4805 could proceed with takeoff. The tower then cleared the KLM 4805 for takeoff but told them to stand by, as the PAA 1736 still maneuvered on the runway. Because of a communication issue, the KLM 4 805 understood its conversation with the tower as a clearance to takeoff and proceeded down the runway where it collided with the PAA 1736. All 248 passengers on board KLM 4805 died and so did 335 passengers on the flight of PAA 1736, making it the deadliest commercial aviation accident to this date, all because of a pilot error.

The Vanishing of Flight MH370 Richard Quest 2016-03-08 CNN Aviation Correspondent Richard Quest offers a gripping and definitive account of the disappearance of Malaysian Airline Flight MH370 in March 2014. On March 8, 2014, Malaysian Airlines Flight MH370 disappeared with barely a trace, carrying 239 people on board—seemingly vanishing into the dark night. The airplane's whereabouts and fate would quickly become one of the biggest aviation mysteries of our time... Richard Quest, CNN's Aviation Correspondent, was one of the leading journalists covering the story. In a coincidence, Quest had interviewed one of the two pilots a few weeks before the disappearance. It is here that he begins his gripping account of those tense weeks in March, presenting a fascinating chronicle of an international search effort, which despite years of searching and tens of millions of dollars spent has failed to find the plane. Quest dissects what happened in the hours following the plane's disappearance and chronicles the days and weeks of searching, which led to nothing but increasing despair. He takes apart the varying responses from authorities and the discrepancies in reports, the wide range of theories, the startling fact that the plane actually turned around and flew in the opposite direction, and what solutions the aviation industry must now implement to ensure it never happens again. What emerges is a riveting chronicle of a tragedy that continues to baffle everyone from aviation experts to satellite engineers to politicians—and which to this day worries the traveling public that it could happen again. Sand and Fire Tom Young 2014-07-10 A remarkable military thriller from one of the most widely acclaimed new suspense writers in years—"Fans of Clancy and Coonts need to add Young to their must-read list" (Booklist). North Africa. A jihadist leader has seized a supply of sarin gas and is wreaking havoc: a nightclub in Sicily, a packed street in Gibraltar. Acting on information, Marine gunnery sergeant A. E. Blount, at six-foot-eight a formidable warrior, the grandson of one of the first black Marines, sets out with his strike force to kill or capture the terrorist. But it is a trap. Several Marines are killed, some are captured, and the jihadist promises that unless forces withdraw, he will execute one prisoner a day. Immediately, Blount's friends and colleagues Sophia Gold, now with the U.N., and Lieutenant Colonel Michael Parson, working for the United States Africa Command, rush to Libya to help coordinate rescue efforts. The ordeal, however, has only begun. Soon they will all be fighting for their lives in the sand and fire of the desert.

Flightpath Teacher's Book Philip Shawcross 2011-08-25 Flightpath is the definitive course for pilots and Air Traffic Controllers who need an ICAO4 level of English to work in the industry. Written by Philip Shawcross, one of the world's leading Aviation English experts, and reviewed by a panel of aviation English specialists, this course offers a thorough grounding in the range of communication skills needed by both pilots and Air Traffic Control Officers (ATCOs) aiming to reach ICAO4 level or above. The Teacher's Book is a complete manual and subject matter reference book for Aviation English teachers of any level of experience, with detailed notes and instructions for each unit. The teacher's notes provide further support and will help the trainer customise the course for pilots, ATCOs and mixed classes.

Human Factors in Air Transport Erik Seedhouse 2019-08-28 This textbook provides students and the broader aviation community with a complete, accessible guide to the subject of human factors in aviation. It covers the history of the field before breaking down the physical and psychological factors, organizational levels, technology, training, and other pivotal components of a pilot and crew's routine work in the field. The information is organized into easy-to-digest chapters with summaries and exercises based on key concepts covered, and it is supported by more than 100 full-color illustrations and photographs. All knowledge of human factors required in aviation university studies is conveyed in a concise and casual manner, through the use of helpful margin notes and anecdotes that appear throughout the text.

Understanding Language Testing Dan Douglas 2014-03-18 *Understanding Language Testing* presents an introduction to language tests and the process of test development that starts at the very beginning. Assuming no knowledge of the field, the book promotes a practical understanding of language testing using examples from a variety of languages. While grounded on solid theoretical principles, the book focuses on fostering a true understanding of the various uses of language tests and the process of test development, scoring test performance, analyzing and interpreting test results, and above all, using tests as ethically and fairly as possible so that test takers are given every opportunity to do their best, to learn as much as possible, and feel positive about their language learning. Each chapter includes a summary, suggestions for further reading, and exercises. As such this is the ideal book for both beginning students of linguistics and language education, or anyone in a related discipline looking for a first introduction to language testing.

Flightpath: Aviation English for Pilots and ATCOs Student's Book with Audio CDs (3) and DVD Philip Shawcross 2011-07-14 Flightpath is the definitive course for pilots and Air Traffic Controllers who need an ICAO4 level of English to work in the industry. Flightpath is the only Aviation English course to offer a thorough grounding in the full range of communication skills needed by aviation professionals to communicate in non-routine situations. With regular focus on ICAO criteria, learners are given full support in reaching industry standards, including case studies, analysis of their own communication skills, exposure to authentic in-flight communication, and communicative tasks. Flightpath is the most accurate preparation course available for any ICAO4 language test, and includes authentic industry training video. Flightpath has been reviewed and endorsed by a panel of leading aviation communication and safety professionals.

Normal Organizational Wrongdoing Donald Palmer 2012-03-29 Instances of wrongdoing in and by organizations have featured heavily in news headlines in recent years. Why do organizational participants—employees, managers, senior officials—engage in illegal, unethical, and socially irresponsible behavior? The dominant view of wrongdoing as an abnormal phenomenon assumes that the perpetrator is a rational, proactive actor, working in isolation. However, Palmer develops an alternative approach in this book, examining wrongdoing as a normal occurrence, produced by boundedly rational actors whose behaviour is shaped by the immediate social context over a period of time. The book provides a comprehensive critical review of the theory and research on organizational wrongdoing. By using rich case study material, it illuminates different perspectives, potential explanations, and policy suggestions for the reduction of organizational wrongdoing.
