Bones voor altijd Kathy Reichs 2013-05-15 Een jonge vrouw die zich Amy Roberts noemt, wordt hevig bloedend opgenomen in een ziekenhuis in Montreal. Als geconstateerd wordt dat ze net een kind heeft gebaard, is de vrouw al weer gevlogen. De politie vindt op het opgegeven adres bloederige handdoeken en schakelt Temperance Brennan in. In het vervallen appartement ontdekt Tempe tot haar afschuw de stoffelijke resten van drie baby's. Volgens de huisbaas woont er ene Alma Rogers. Dan duikt er iemand op die Alva Rodrigez zoekt. Is dit dezelfde persoon? Heeft ze haar eigen kinderen gedood? En waar is ze gebleven? Met haar oude vlam, detective Andrew Ryan, en RCMP-sergeant Ollie Hasty, met wie ze helaas ook wat heeft gehad, volgt Tempe het spoor naar Yellowknife, een afgelegen diamantmijn. Wat ze daar ontdekken is gruwelijker dan ze zich hadden kunnen voorstellen.

Group Theory and Numerical Analysis Pavel Winternitz The Workshop on Group Theory and Numerical Analysis brought together scientists working in several different but related areas. The unifying theme was the application of group theory and geometrical methods to the solution of

differential and difference equations. The emphasis was on the combination of analytical and numerical methods and also the use of symbolic computation. This meeting was organized under the auspices of the Centre de Recherches Mathematiques, Universite de Montreal (Canada). This volume has the character of a monograph and should represent a useful reference book for scientists working in this highly topical field.

Cultuur van angst Frank Furedi 2011-10-07 Angst maakt in de eenentwintigste eeuw een steeds groter deel uit van het bestaan. Angst voor ziektes, onbekende virussen en epidemieën, kindermisbruik, milieuverontreiniging en terroristische aanvallen. We worden overdonderd met nieuwsverslagen over onze veiligheid en die van onze kinderen en zoeken naar nieuwe voorzorgsmaatregelen en beveiliging. Maar in vergelijking met het verleden of met de derde wereld valt het allemaal wel mee en zijn mensen in het huidige Westen helemaal niet zo bekend met pijn, lijden, zwakke gezondheid en dood. Eigenlijk genieten we een mate van persoonlijke veiligheid die uniek is in de geschiedenis. Als we geconfronteerd worden met de aanslagen op het wtc of in Madrid is angst voor de toekomst onvermij - delijk en begrijpelijk, maar Frank Furedi laat in zijn sprankelende en provocatieve boek zien dat we ons minstens even grote zorgen maken over genetisch gemanipuleerd voedsel en de schadelijke invloed van mobieltjes. De feiten ondersteunen de angstverhalen over een groeiend risico voor onze gezondheid en veiligheid niet. Cultuur van angst biedt een optimistische analyse in een buitengewoon pessimistische tijd.
