Murder and the Making of English CSI Ian Burney 2016-09-18 A history of the origins and development of forensic science in murder investigations in early twentieth-century England. Crime scene investigation—or CSI—has captured the modern imagination. On television screens and in newspapers, we follow the exploits of forensic officers wearing protective suits and working behind police tape to identify and secure physical evidence for laboratory analysis. But where did this ensemble of investigative specialists and scientific techniques come from? In *Murder and the Making of English CSI*, Ian Burney and Neil Pemberton tell the engrossing history of how, in the first half of the twentieth century, novel routines,

regulations, and techniques—from chain-of-custody procedures to the analysis of hair, blood, and fiber—fundamentally transformed the processing of murder scenes. Focusing on two iconic English investigations—the 1924 case of Emily Kaye, who was beaten and dismembered by her lover at a lonely beachfront holiday cottage, and the 1953 investigation into John Christie’s serial murders in his dingy terraced home in London’s West End—Burney and Pemberton chart the emergence of the crime scene as a new space of forensic activity. Drawing on fascinating source material ranging from how-to investigator handbooks and detective novels to crime journalism, police case reports, and courtroom transcripts, the book shows readers how, over time, the focus of murder inquiries shifted from a primarily medical and autopsy-based interest in the victim’s body to one dominated by laboratory technicians laboring over minute trace evidence. *Murder and the Making of English CSI* reveals the compelling and untold story of how one of the most iconic features of our present-day forensic landscape came into being. It is a must-read for forensic scientists, historians, and true crime devotees alike. “Out of some pretty gruesome parts, Burney and Pemberton have assembled a remarkably elegant account of the making of modern murder investigation. Their analysis combines scholarly sophistication with a clarity of prose that entertains, informs, and surprises. *Murder and the Making of English CSI* brims with insight about the historical path that led to our forensic present.” —Mario Biagioli, UC Davis School of Law, author of *Galileo's Instruments of Credit: Telescopes, Images, Secrecy* “This nuanced and fascinating history of English crime scene reconstruction has an uncanny prescience for today’s debates about how to manage crime scene evidence.” —Simon A.

23 dingen die ze je niet vertellen over het kapitalisme Ha-Joon Chang 2011-05-11 Kritische analyse van vrijemarktdenken Er zijn misschien wat nadelen aan verbonden, maar er is eigenlijk geen alternatief voor de vrijemarkteconomie. We worden er toch ook allemaal beter van? Fout. Ha-Joon Chang, een van de meest gerespecteerde economen ter wereld, maakt in dit boek korte metten met de grootste mythes over de economie in het algemeen en het vrijemarktdenken in het bijzonder. Niet iedereen wordt rijker van marktwerking, duurbetaalde managers leveren niet per se betere prestaties en we leven niet in een postindustriële economie. Chang weet elk idee dat wij over economie hebben op zn kop te zetten. 23 dingen die ze je niet vertellen over het kapitalisme, boordevol informatie over geld, gelijkheid, vrijheid en hebzucht, laat zien dat de vrije markt veel verliezers kent en vaak leidt tot een inefficiënte manier van economie bedrijven. In dit prikkelende boek legt de auteur, die in de traditie staat van John Kenneth Galbraith and Joseph Stiglitz, uit hoe de economie echt werkt en waarom verstandig overheidsbeleid meestal tot betere resultaten leidt dan pure marktwerking.
