Trauma Care Pre-Hospital Manual Ian Greaves 2018-12-07 This new book provides evidence based guidelines for the immediate clinical management of major trauma. It has been written by clinicians with many years of trauma experience, and endorsed as authoritative by Trauma Care (UK). The UK now has highly effective trauma systems. Clinical developments include the introduction of damage control resuscitation, tranexamic acid, blood product resuscitation, novel hybrid resuscitation and an emphasis on the control of major external haemorrhage as part of a new ABCDE approach. Consequently, more individuals with major trauma are surviving than ever before. Optimal pre-hospital care is essential for improved survival rates and reduced morbidity.

Vertical Horizons Douglas M. Grant 2017-10-07 "Looking back over thirty years of flying for Okanagan, I see the experience has given me an interesting life. I have never really considered flying as work. It is more a way of life, a way of life that nourishes a free spirit, something that not many jobs can give you. I just cannot imagine anything I would... rather have done or any company I would have rather worked for." --Jim Reid, pilot In 1945, following years as an instructor, Carl Agar was honourably discharged from the British and Commonwealth Air Training Plan and moved to Penticton where he began looking for flying opportunities. A first attempt to start a flying club never took off but Agar and his partners Barney Bent and Alf Stringer were determined to get off the ground. They began looking at commercial ventures and in 1947 Okanagan Air Services (OAS) was formed to provide instruction and contract work. After a rough start--while demonstrating fruit spraying, Agar crashed a helicopter into power lines--the company got a break in May 1948 when the Fraser floods swamped the valley and OAS received a mosquito-spraying contract. From there the company flourished, going on to fly the first unaccompanied commercial helicopter ferry flight from Canada to the UK, monitor polar bears in the High Arctic, provide offshore oil rig support during monsoons, and, at the company's high point, operate in over 33 countries with 600 employees and 126 helicopters. Back home, Agar opened the Mountain Flying School in Penticton, which is still in operation today and has trained thousands of civilian and

military pilots from all over the world. Vertical Horizons is also the story of the employees who were pivotal to the success of the company. Individuals' experiences range from tragic to humorous and include a UFO sighting in the Arctic, witnessing the Jonestown massacre and a rescue of Vietnamese refugees off the coast of Thailand. Featuring first-hand accounts, extensive research and a multitude of photographs, Vertical Horizons is the first-ever history of the company that pioneered flying high-mountain terrain--making it a must-read for any aviation buff.

Aerospace Engineering 1994

Learning to Fly Helicopters, Second Edition R. Randall Padfield 2013-10-15 Updated for the first time in 20 years, this complete guide to helicopter flight training introduces the beginner pilot to common manoeuvres and flight mechanics, and helps you navigate the transition into the professional pilot industry.
