The Overstory Richard Powers 2019-04-11 THE MILLION-COPY GLOBAL BESTSELLER and WINNER OF THE PULITZER PRIZE FOR FICTION 'It changed how I thought about the Earth and our place in it' Barack Obama 'Really, just one of the best novels, period' Ann Patchett A wondrous, exhilarating novel about nine strangers brought together by an unfolding natural catastrophe. The perfect literary escape. An artist inherits a hundred years of photographic portraits, all of the same doomed American chestnut. A hard-partying undergraduate in the late 1980s electrocutes herself, dies, and is sent back into life by creatures of air and light. A hearing- and speech-impaired scientist discovers that trees are communicating with one another. An Air Force crewmember in the Vietnam War is shot out of the sky, then saved by falling into a banyan. This is the story of these and five other strangers, each summoned in different ways by the natural world, who are brought together in a last stand to save it from catastrophe. 'It's not possible for Powers to write an uninteresting book' Margaret Atwood 'Radical and exciting' Jessie Burton 'Breathtaking' Barbara Kingsolver

This introduction to the life of the past as revealed through fossils includes: -Descriptions of the typical plants and animals of major geological eras -Maps showing where fossils can be found -The history of the development of life on earth Full-color illustrations and concise information make this an invaluable and enjoyable guide to a fascinating subject.

Insects Herbert Spencer Zim 1987

Gamebirds Alexander Sprunt 1961 Pictures 89 game birds, identifying their breeding and wintering ranges, scientific and local names, size, weight, flight speed, and nesting and feeding habits.

Dinosaurs Eugene S. Gaffney 2014-02-25 This eBook is best viewed on a color device. Dinosaurs have long been a source of speculation. This beautifully illustrated guide includes: - Fascinating facts about these animals that ruled the earth for more than 100 million years - Key features that make each individual genus distinctive - The latest information about how dinosaurs evolved and why they became extinct Dinosaurs is an indispensable reference for everyone intrigued by these mighty creatures.

Fossils; a Guide to Prehistoric Life Frank Harold Trevor Rhodes 1962

Outdoor School: Rock, Fossil, and Shell Hunting Odd Dot 2021-04-27 Writer Jennifer Swanson and artist John D. Dawson invite you to rewild your life! With metal corners and 448 full-color, highly-illustrated pages, Outdoor School: Rock, Fossil & Shell Hunting by Odd Dot is an indispensable tool for young explorers and rock collectors. Make every day an adventure with the included: - Immersive activities to get you exploring - Write-in sections to journal about experiences - Next-level adventures to challenge even seasoned nature lovers No experience is required—only curiosity and courage. This interactive field guide to rocks, fossils, & shells, includes: -Digging, chiseling, hammering, and wading for rocks and minerals -Identifying rocks & minerals by location, texture, color, shape and size -Determining between rocks, geodes, and space rocks -Finding fossils and setting up a dig site -Searching and snorkeling for shells -Storing and displaying your collection And so much more!

Explorers of Deep Time Roy Plotnick 2022-01-04 Paleontology is one of the most visible yet most misunderstood fields of science. Children dream of becoming paleontologists when they grow up. Museum visitors flock to exhibits on dinosaurs and other prehistoric animals. The media reports on fossil discoveries and new clues to mass extinctions. Nonetheless, misconceptions abound: paleontologists are assumed only to be interested in dinosaurs, and they are all too often imagined as bearded white men in battered cowboy hats. Roy Plotnick provides a behind-the-scenes look at paleontology as it exists today in all its complexity. He explores the field's aims, methods, and possibilities, with an emphasis on the compelling personal stories of the scientists who have made it a career. Paleontologists study the entire history of life on Earth; they do not only use hammers and chisels to unearth fossils but are just as likely to work with cutting-edge computing technology. Plotnick presents the big questions about life's history that drive paleontological research and shows why knowledge of Earth's past is essential to understanding present-day environmental crises. He introduces readers to the diverse group of people of all genders, races, and international backgrounds who make up the twenty-first-century paleontology community, foregrounding their perspectives and firsthand narratives. He also frankly discusses the many challenges that face the profession, with key takeaways for aspiring scientists. Candid and comprehensive, Explorers of Deep Time is essential reading for anyone curious about the everyday work of real-life paleontologists.

Flowers Herbert Spencer Zim 1991-03 Color illustrations, concise descriptions, and range maps introduce a variety of types of American wild flowers, organized by color.

Birds of North America Herbert S. Zim 1990-02-15 Text and illustrations identify 645 species of birds.

Outdoor Book Connie Coutellier 1980

A Guide to Field Guides Diane Schmidt 1999 Focusing on the North American continent, this book, the first of its kind, identifies and describes major field guides in all scientific subject areas (from plants, animals, and insects to astronomy and weather, geology and fossils, and man-made objects). Organized by topic, it offers complete bibliographic information and descriptions of more than

1,300 field guides.

Fossils Herbert Spencer Zim, Ph.D., SC.D. 1990-12-01

Fossils Frank Harold Trevor Rhodes 1962-10 Comprehensive guide to fossils, containing information on formation, collection, and a systematic outline of typical invertebrate, vertebrate, and plant fossil groups

Weather Paul E. Lehr 1987 Provides information about weather, including weather instruments used and how to interpret weather maps.

The Publishers' Trade List Annual 1992

A Guide to Spiders and Their Kin Herbert Walter Levi 1968

Bulletin 1946

Seashores Herbert Spencer Zim 1991-03 A guide to identification of marine plant and animal life along 88,600 miles of tidal shoreline of the United States.

Rocks and Minerals Paul R. Shaffer 1989-02-15

Plants Herbert S. Zim 1948-10

Dinosaurs Eugene S. Gaffney 1991-03 Provides a detailed look at the evolution, habitat, behavior, life cycles, characteristics, and extinction of dinosaurs.

Butterflies and Moths Robert T. Mitchell 1987 Guide to butterflies and moths, easy to use and read colourful pictures.

Natural History Collector: Hunt, Discover, Learn! Michael Sanchez 2017-12-19 Loaded with hands-on, kid-friendly projects, Natural History Collector: Hunt, Discover, Learn! will teach budding nature collectors techniques for cleaning, caring for, and displaying discovered treasures. Coming home from the beach or a walk in the woods with a fine collection of rocks, shells, pine cones, and seed pods is easy. The trick is knowing what to do with them once you get them back to your room. The real fun comes from identifying, preserving, and displaying your treasures! Natural History Collector: Hunt, Discover, Learn! is full of hands-on, kid-friendly projects for the budding naturalist. The opening chapter introduces kids to different ways of creating their personal field guides for keeping track of what they see, when and where they see it, and what makes it interesting. They'll move on to techniques for cleaning and caring for treasures, such as drying flowers, pressing leaves, and desalinizing rocks and shells. The book's drawings and photographs will help kids discover what to look for when they examine feathers, seeds, and minerals (and recognize the difference between sedimentary, igneous, and metamorphic). Extra projects focus on display; making shadow boxes, creating collectors' cases from egg cartons and candy boxes, labeling, hanging, and mounting collections.

The Fossils and Rocks of Eastern Iowa J. N. Rose 1967

Fossils, Rocks, and Time Lucy E. Edwards 1993

Fossils Frank Harold Trevor Rhodes 1989-02 Golden has one of the most authoritative and largest selections of nature guide available. Perfect for nature lovers of all ages, this guide to fossils is a convenient size for outdoor use on field projects, hiking, and vacations. Full-color illustrations, non-technical language, and up-to-date range maps complete this comprehensive pocket reference.

A Collector's Guide to Rock, Mineral, & Fossil Localities of Utah James R. Wilson 1995 With the tremendous growth of population in this and neighboring states, there are more collectors than ever before and with the rapidly escalating prices for mineral and fossil specimens in the retail market, there is a great demand for displayable material. It has become necessary for professional geologists, hobby collectors, and commercial collectors to recognize each others existence and to try to work together within a framework of regulation, courtesy, and common sense so that material of scientific value is not lost and undue restrictions are not placed upon collecting. There is a continuing need for collectors and professionals to work together with resource managers and legislators to develop workable laws and rules affecting the collecting of minerals and fossils. This publication contains details information about collecting areas, divided by county to make for ease of use. Each collecting area contains information about the minerals, rocks, or fossils present, map recommendations, and other helpful tips on getting to the sites.

Tot in de hemel Richard Powers 2018-10-01 'Tot in de hemel' van Richard Powers is het verhaal van negen mensen die de wereld van de bomen leren zien – en horen. Een laadmeester bij de Amerikaanse luchtmacht die tijdens de Vietnamoorlog gered wordt door een bodhiboom, een verguisde wetenschapster die bomen met elkaar hoort communiceren, een kunstenaar met een bijzondere verzameling foto's van een bedreigde kastanjeboom: deze drie, en nog zes anderen, allen onbekenden van elkaar, zullen op verschillende manieren betrokken raken bij een laatste, heftige verzetsdaad om de resterende paar hectare oerwoud van het Noord-Amerikaanse continent van de ondergang te redden. 'Tot in de hemel' is Powers ten voeten uit: een verrassende fusie van natuurwetenschap en literatuur, een monumentale roman over bomen en mensen. Het is een meeslepende vertelling over activisme en verzet, en tegelijkertijd een loflied op een wereld naast de onze.

Rocks and Minerals Herbert Spencer Zim 1957 Guide to more than 400 specimens of rocks, gems, and minerals, identifying their properties and characteristics, and explaining their importance to man.

Western Gem Hunters Atlas Humphrey Cyril Johnson 1973

Seashells of the World Robert Tucker Abbott 1985 A guide for the identification of shells, including general information on mollusks and advice on shell collecting and study.

Ancient Seas of Southern Florida Edward J. Petuch 2021-08-12 The authors have done an outstanding job of compiling decades of data collected by their own field reconnaissance and other geoscientists... This represents a significant contribution to the understanding of the development of the Florida carbonate platform, and it will assist other disciplines as they strive for better understanding of our groundwater resources, aquifer characterizations, paleoenvironmental interpretations, and historical/educational geology programs. Walt Schmidt, Florida State Geologist & Chief, Florida Geological Survey, USA (praise for the first edition) Painting a complete picture of the history of the Everglades, Ancient Seas of Southern Florida: The Geology and Paleontology of the Everglades Region, Second Edition provides an overview of the geology, paleontology, and paleoceanography of the region. It emphasizes the upper 300m of the geologic framework of the area and

gives insight into the local stratigraphy, geomorphology, lithology, and historical geology. Designed to be a field guide as well as a reference, the book is illustrated in full color with brand new photographs of exposed geologic sections, stratotype localities, collection sites, and details of interesting fossil beds. In this book, the authors illustrate almost 800 of the most important and diagnostic stratigraphic index fossils found in these beds, including over 50 species of corals and almost 700 species of mollusks, along with echinoderms, crustaceans, echinoids, petrified wood, and aquatic vertebrates. A new edition of *The Geology of the Everglades and Adjacent Areas*, it contains larger images of fossil shells, corals, and echinoderms and includes new updated geological data and concepts, as well as an expanded iconography of stratigraphic index fossils. Based on the data gleaned from these fossils, it also offers a series of geomorphological visualizations, showing the possible appearances of the Florida Peninsula during the times when it was covered by tropical seas, from the Oligocene to the late Pleistocene. This second edition provides a new perspective on both the historical geology of southern Florida and the evolution of one of America's most beautiful natural treasures, the Everglades.

*Kits, Games, and Manipulatives for the Elementary School Classroom* Andrea C. Hoffman 1993 This comprehensive sourcebook, which identifies and locates kits, games, and manipulatives, is organized into broad subject areas, including reading and language arts, mathematics, social studies, science and health, and the arts. Some 1,500 entries provide physical descriptions of the materials and

*Mammals* Herbert Spencer Zim 1987 Examines the family trees, behavior and habitats of more than 200 common species of mammals in North America.

*The Golden Guide Nature Center* Herbert Spencer Zim 1982-07-01

*Flowers* Herbert Spencer Zim 1987 A guide to approximately 200 of the most common American wildflowers.

*The Indian Mesozoic Chronicle* Jai Krishna 2017-03-11 The book reviews and summarizes the Indian Mesozoic geological evolution in an innovative alternative perspective of sequence stratigraphy. It mainly focuses on the Jurassic interval, but also concisely discusses the preceding Triassic and Cretaceous geological records. The key to the study is primarily held in the recently developed ammonoid based high resolution scales in the Triassic and Jurassic period. The Indian Jurassic record is thus elevated to a high resolution pedestal. The large intra-Jurassic stratigraphic gap in Kachchh, with increase in duration from margin to basin, has been précised in different sections, along with radical revision of its long held interpretation from sub-aerial to sub-marine all over from Arabia to Australia. Other significant gaps are also differentiated into sub-aerial and sub-marine. The Indian Late Precambrian – Neogene record is organized into five mega-sequences. Among these, the fourth – also the most important one – includes the intra-Permian to Early Eocene interval from the origin to the closure of the Neotethys. Based on multidisciplinary integration of the Indian Mesozoic geological record and comparison with hydrocarbon producing basins on east and west of India, a highly positive scenario of the hydrocarbon source/reservoir sediment perspective is outlined in the book in sequence stratigraphic backdrop as an edifice for future elaborate evaluation.
