Stonehenge Complete Christopher Chippindale 1983 "People have puzzled over Stonehenge for centuries, speculating and dreaming about it, drawing and painting it, trying to make sense of it. Here is the story of the one real Stonehenge, as well as the many unreal Stonehenges that archaeologists, tourists, mystics, astronomers, artists, poets, and visionaries have made out of it. New studies in the last decade have revolutionized our knowledge of the complex sequence of structures that make its celebrated profile, in particular indicating that the monument is decidedly older than was once thought. Moreover, as Chippindale shows, we know now that the main alignment at Stonehenge was not in fact on midsummer sunrise but rather on midwinter sunset." -- Amazon.com viewed August 13, 2020.

Quiver Susan B. A. Somers-Willett 2009 At the crossroads of science, mathematics, and art lives Quiver, a stunning collection of poems that seeks to reconcile the empirical truths of science with the emotional truths of human experience. Through an ambitious set of poetic series and sequences, Somers-Willett reinvents the love poem, rendering an exquisite world where the graph of a mathematical equation can become the image of "love's witness / running with its arms open all the way home." With a deft, meditative sense of music, Quiver reveals a relationship between science and human sentiment that is as surprising as it is profound.

Winter Solstice Rosamunde Pilcher 2000-08-01 In Winter Solstice Rosamunde Pilcher brings her readers into the lives of five very different people.... Elfrida Phipps, once of London's stage, moved to the English village of Dibton in hopes of making a new life for herself. Gradually she settled into the comfortable

familiarity of village life -- shopkeepers knowing her tastes, neighbors calling her by name -- still she finds herself lonely. Oscar Blundell gave up his life as a musician in order to marry Gloria. They have a beautiful daughter, Francesca, and it is only because of their little girl that Oscar views his sacrificed career as worthwhile. Carrie returns from Australia at the end of an ill-fated affair with a married man to find her mother and aunt sharing a home and squabbling endlessly. With Christmas approaching, Carrie agrees to look after her aunt's awkward and quiet teenage daughter, Lucy, so that her mother might enjoy a romantic fling in America. Sam Howard is trying to pull his life back together after his wife has left him for another. He is without home and without roots, all he has is his job. Business takes him to northern Scotland, where he falls in love with the lush, craggy landscape and sets his sights on a house. It is the strange rippling effects of a tragedy that will bring these five characters together in a large, neglected estate house near the Scottish fishing town of Creagan. It is in this house, on the shortest day of the year, that the lives of five people will come together and be forever changed. Rosamunde Pilcher's long-awaited return to the page will warm the hearts of readers both old and new. *Winter Solstice* is a novel of love, loyalty and rebirth.

Sticks, Stones, and Shadows Martin Isler 2001 What do the pyramids of Egypt really represent? What could have driven so many to so great, and often so dangerous, an effort? Was the motivation religious or practical? Illustrated with more than 300 photographs and drawings, this book presents an original approach to the subject of pyramid building. It reveals the connection between devices that served both a practical need for survival and a spiritual belief in gods and goddesses. It examines Egyptian technologies and techniques from the origins of pyramid development to the step-by-step details of how the ground was leveled, how the site was oriented, and how the stone was raised and placed to meet at a distant point in the sky. Here the author also asks and answers questions virtually ignored for the last century. He discloses, for example, the ancient use of shadows, now denigrated to the ornamental back-yard sundial, but once an important tool for telling the height of an object, geographical directions, the seasons of the year, and the time of day. He also reinterprets the ancient "stretching of the cord" ceremony, which once was thought to have only religious significance but here is shown as the means of establishing the sides of a pyramid.

Heaven and Earth in Early Han Thought John S. Major 1993-01-01 The Huainanzi has in recent years been recognized by

scholars as one of the seminal works of Chinese thought at the beginning of the imperial era, a summary of the full flowering of early Taoist philosophy. This book presents a study of three key chapters of the Huainanzi, "The Treatise on the Patterns of Heaven," "The Treatise on Topography," and "The Treatise on the Seasonal Rules," which collectively comprise the most comprehensive extant statement of cosmological thinking in the early Han period. Major presents, for the first time, full English translations of these treatises. He supplements the translations with detailed commentaries that clarify the sometimes arcane language of the text and presents a fascinating picture of the ancient Chinese view of how the world was formed and sustained, and of the role of humans in the cosmos.
